2.1 Logo
Overview

All Hyundai marketing communication uses the 2-D logo, which consists of a symbol and a wordmark. Both elements are presented together as a lockup.

The horizontal version is preferred.

Vertical logo
A vertical version of the Hyundai logo is available for situations in which the standard horizontal version cannot be used. This version may only be used with permission.

Symbol only
The symbol may appear alone but only in very limited circumstances. This includes applications in which the symbol appears within a Hyundai communication context (e.g., a website or internal collateral item) or in which the full logo already appears elsewhere (e.g., merchandise).
Horizontal version
Protection zone and minimum size

The Hyundai horizontal logo version is preferred. It consists of a symbol and a wordmark and appears as a lockup.

The horizontal and vertical dimensions of the protection zone area are derived from the symbol height. A protective zone ensures optimal brand representation.

Protection zone

Minimum size

The minimum horizontal logo width is 20mm.
Vertical version and symbol
Protection zone and minimum size

A vertical Hyundai logo version is also available. Like the horizontal variant, it consists of a symbol and a wordmark and is presented as a lockup.

The protection zone helps communicate our brand in the most effective way possible. Its specifications are derived from the height and width of the symbol.
